

The Automated Documentation Ecosystem

AI-Driven Workflows,
TechWriter Agent, and
Continuous Publishing

The Core Philosophy

Docs-as-Code

- Version-controlled in the monorepo
- Synchronized alongside source code
- Deployed via automated CI/CD pipelines

FOUNDATIONAL TRIAD
(ISOMETRIC VIEW)

AI-Augmented

- TechWriter agent handles heavy lifting
- Automated sidebar generation
- Automated QA and release notes drafting

User-Centric Structure

- Strict adherence to Diátaxis framework
- Information categorized by user intent
- Focus on acquisition and application

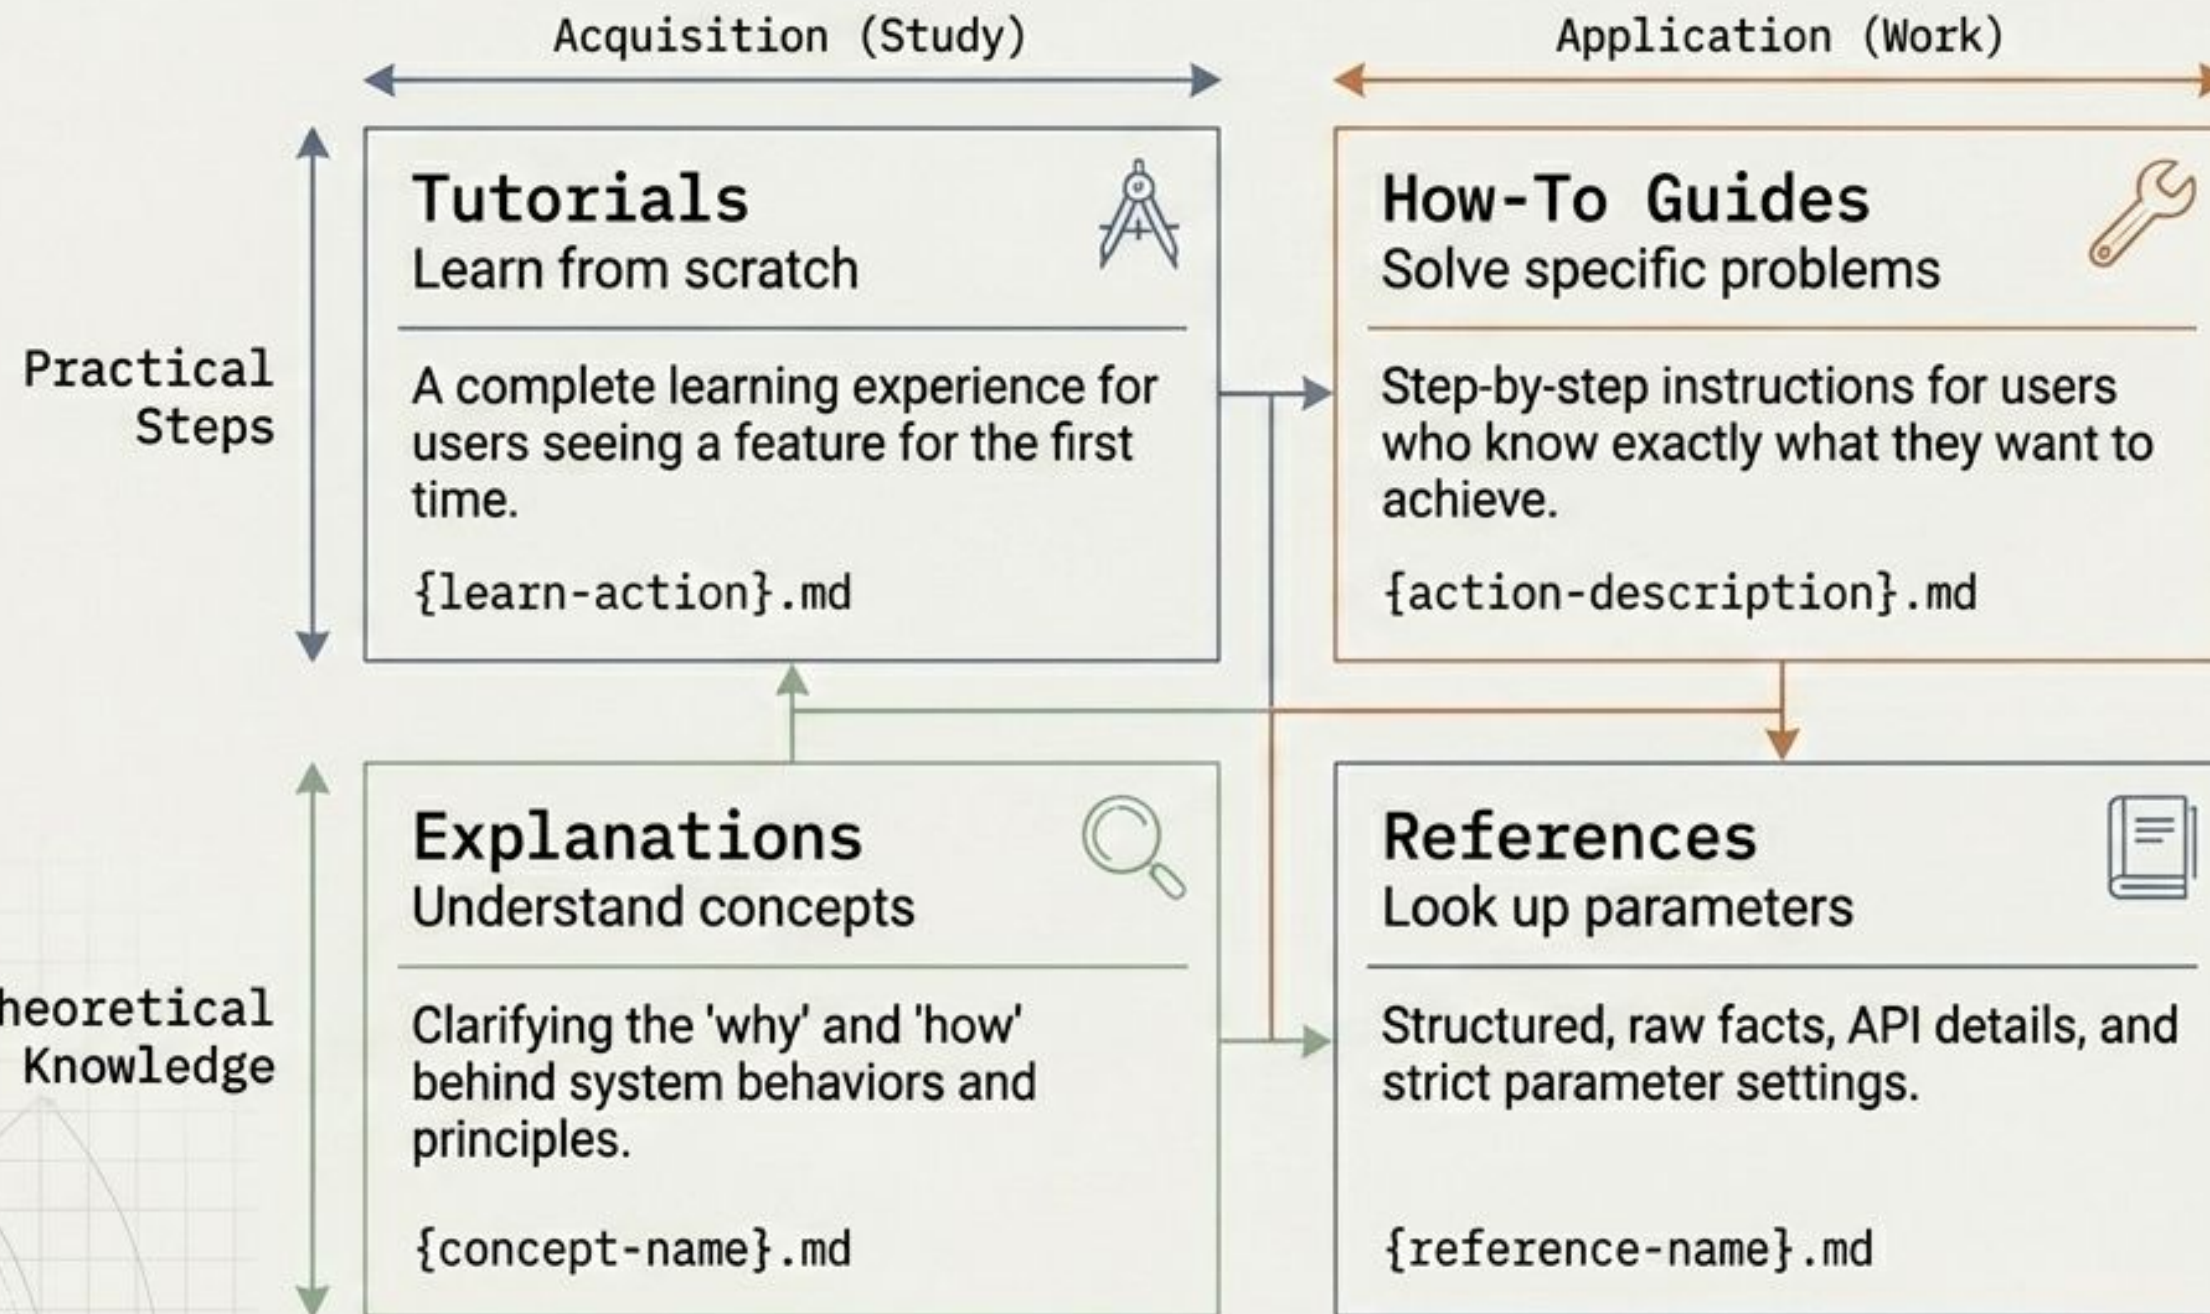

AUTOMATION SUITE

SYSTEMS ARCHITECTURE

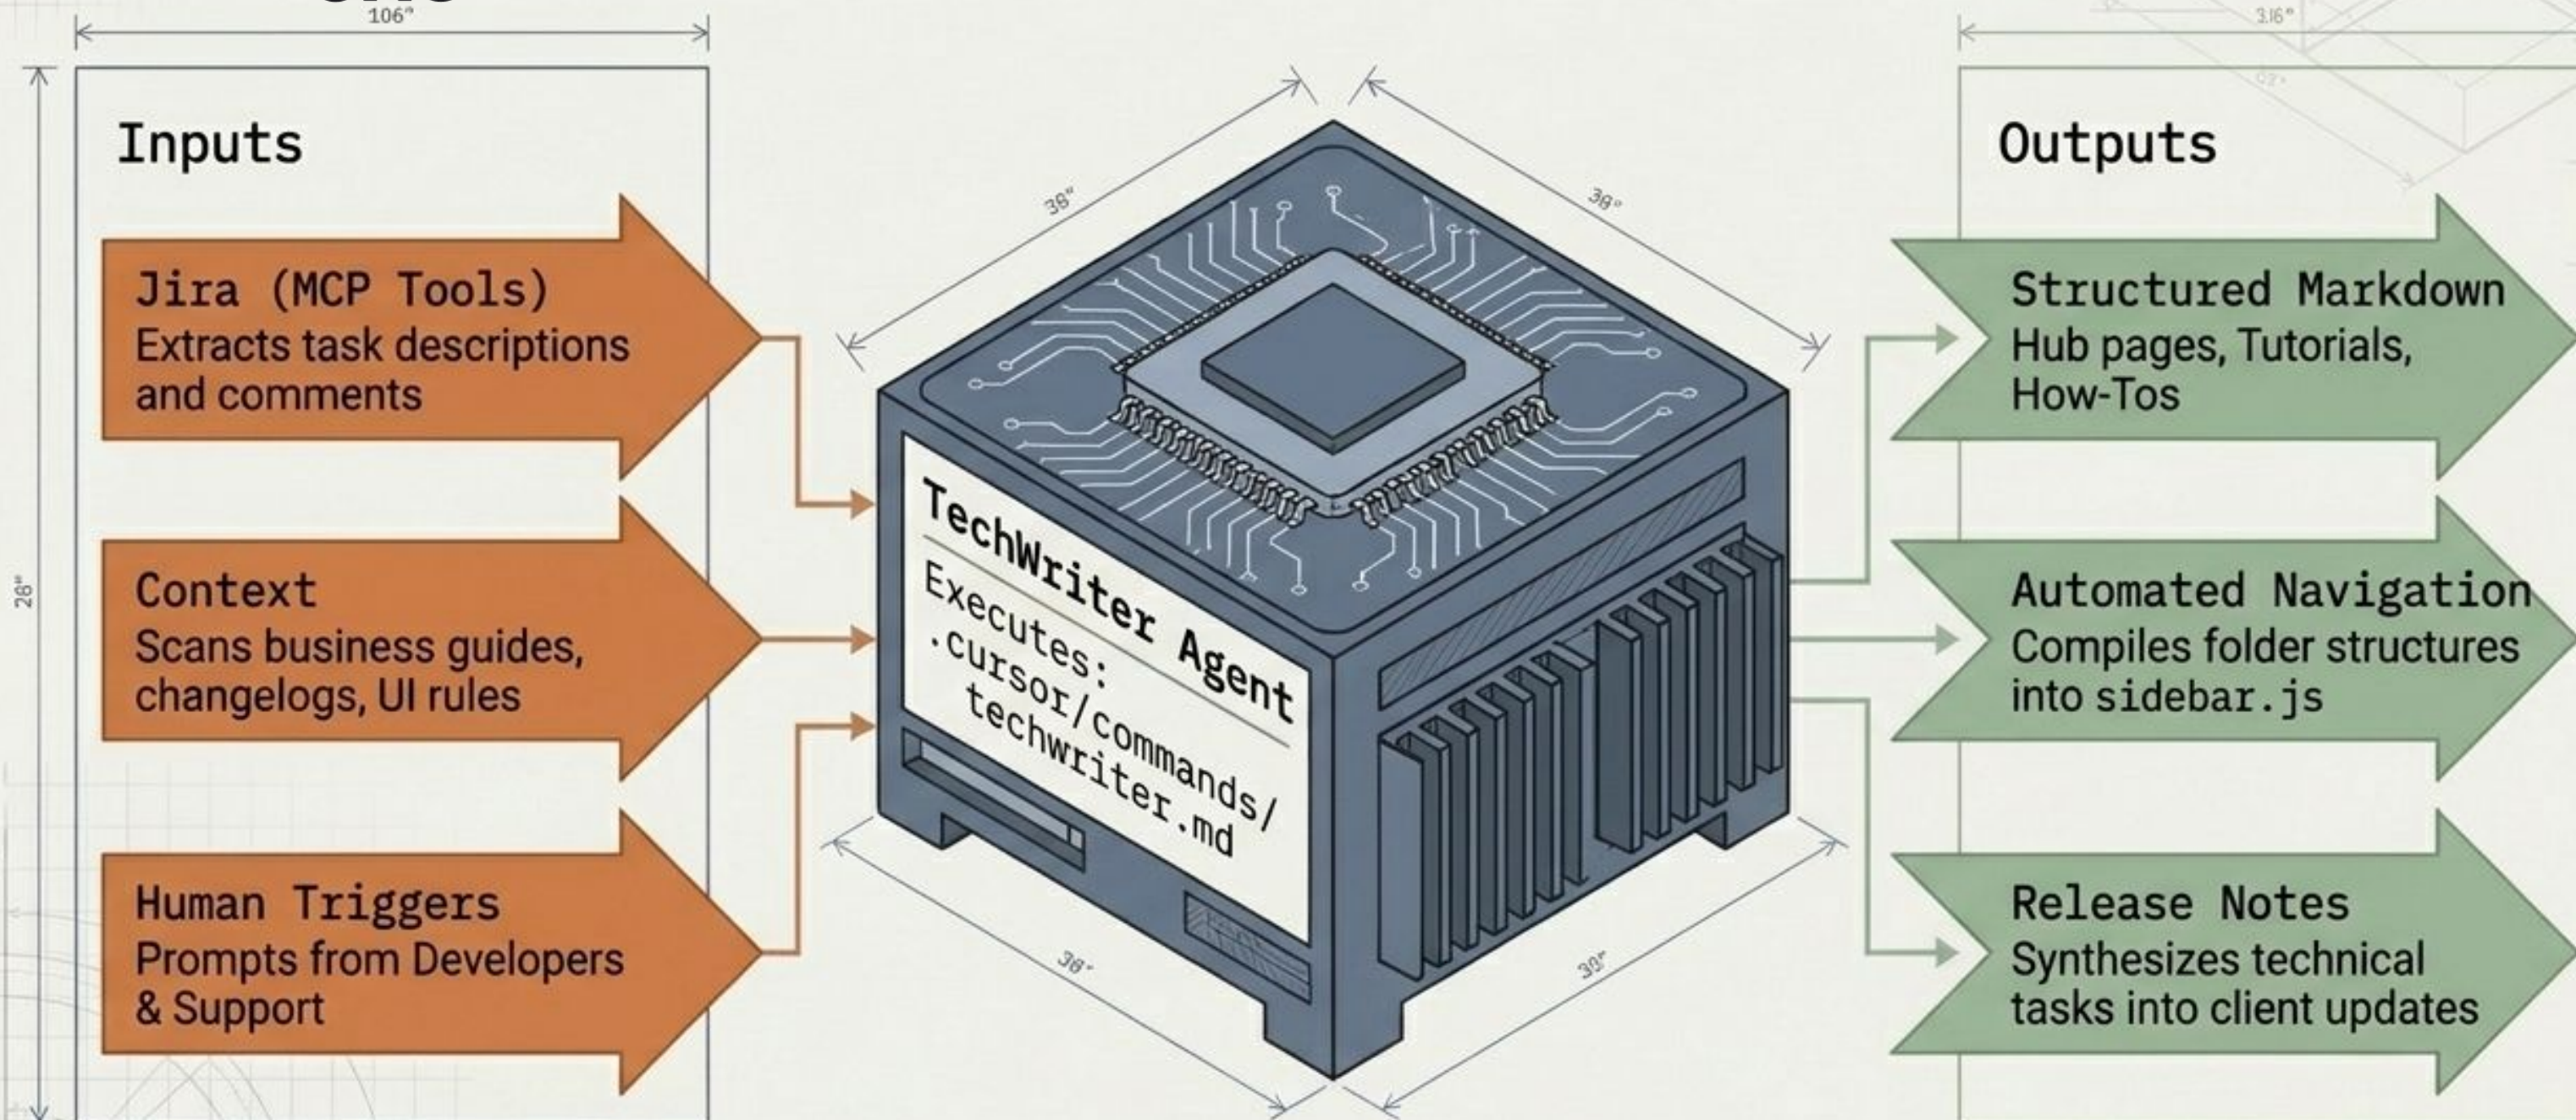

UX FRAMEWORK

FOUNDATIONAL TRIAD
(ISOMETRIC VIEW)

Information Architecture: The Diátaxis Framework

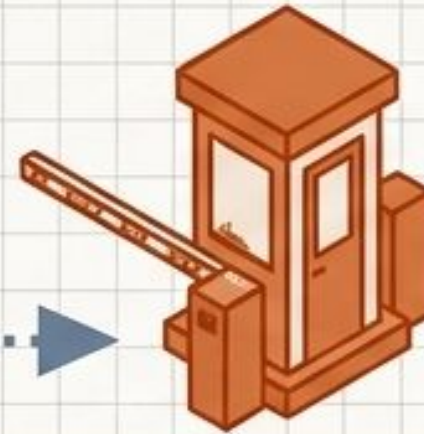

The Engine: TechWriter AI

Developer Workflow & Governance

The Governance Gatekeeper
Rule: docs-check-before-merge.mdc

 Feature Branch

 Release Branch
(Production)

Inspection

- [] overview.md (Problem & Solution)
- [] CHANGELOG.md (Technical details)
- [] release_notes.md (Client-facing impact)

If release notes dictate client-facing changes, the AI blocks the merge until the TechWriter updates the public documentation.

1 2

The Support Loop: From Ticket to Truth

Trigger: Support identifies missing or outdated documentation during client resolution.

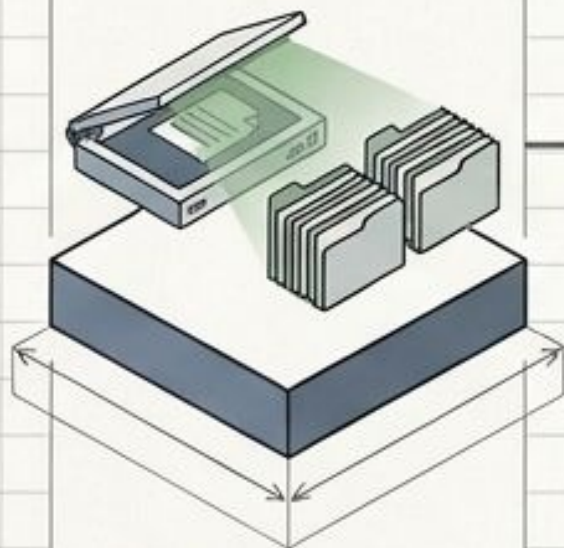

TechWriter Agent: Phases & Skills

connective
one

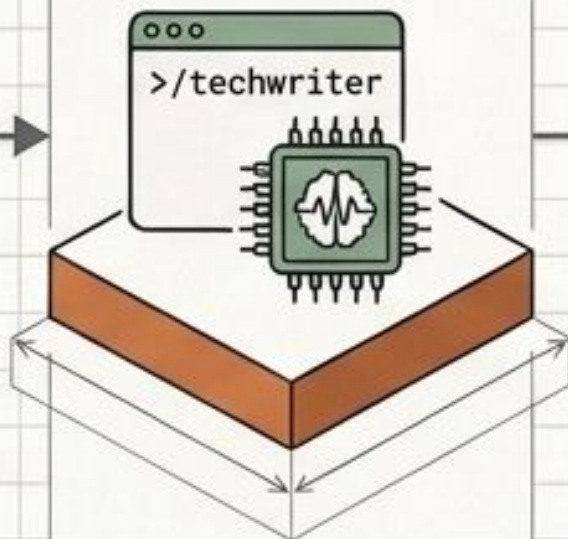

Phases of Operation

Scan & Structure

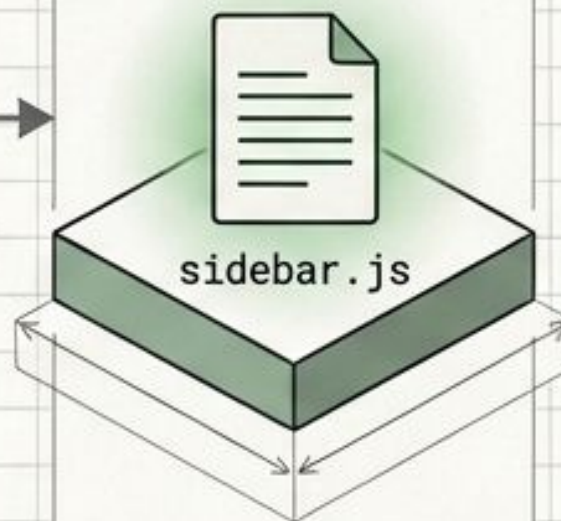

Scans
docs/client/{lang}/
directory, builds
hierarchy.

Process & Validate

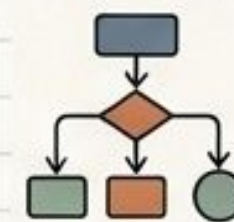

Checks links,
terminology, and
consistency.

Generate Output

Creates sidebar.js
and optimized
content.

Key Skills

Automated Structuring
Hierarchical organization of
documentation.

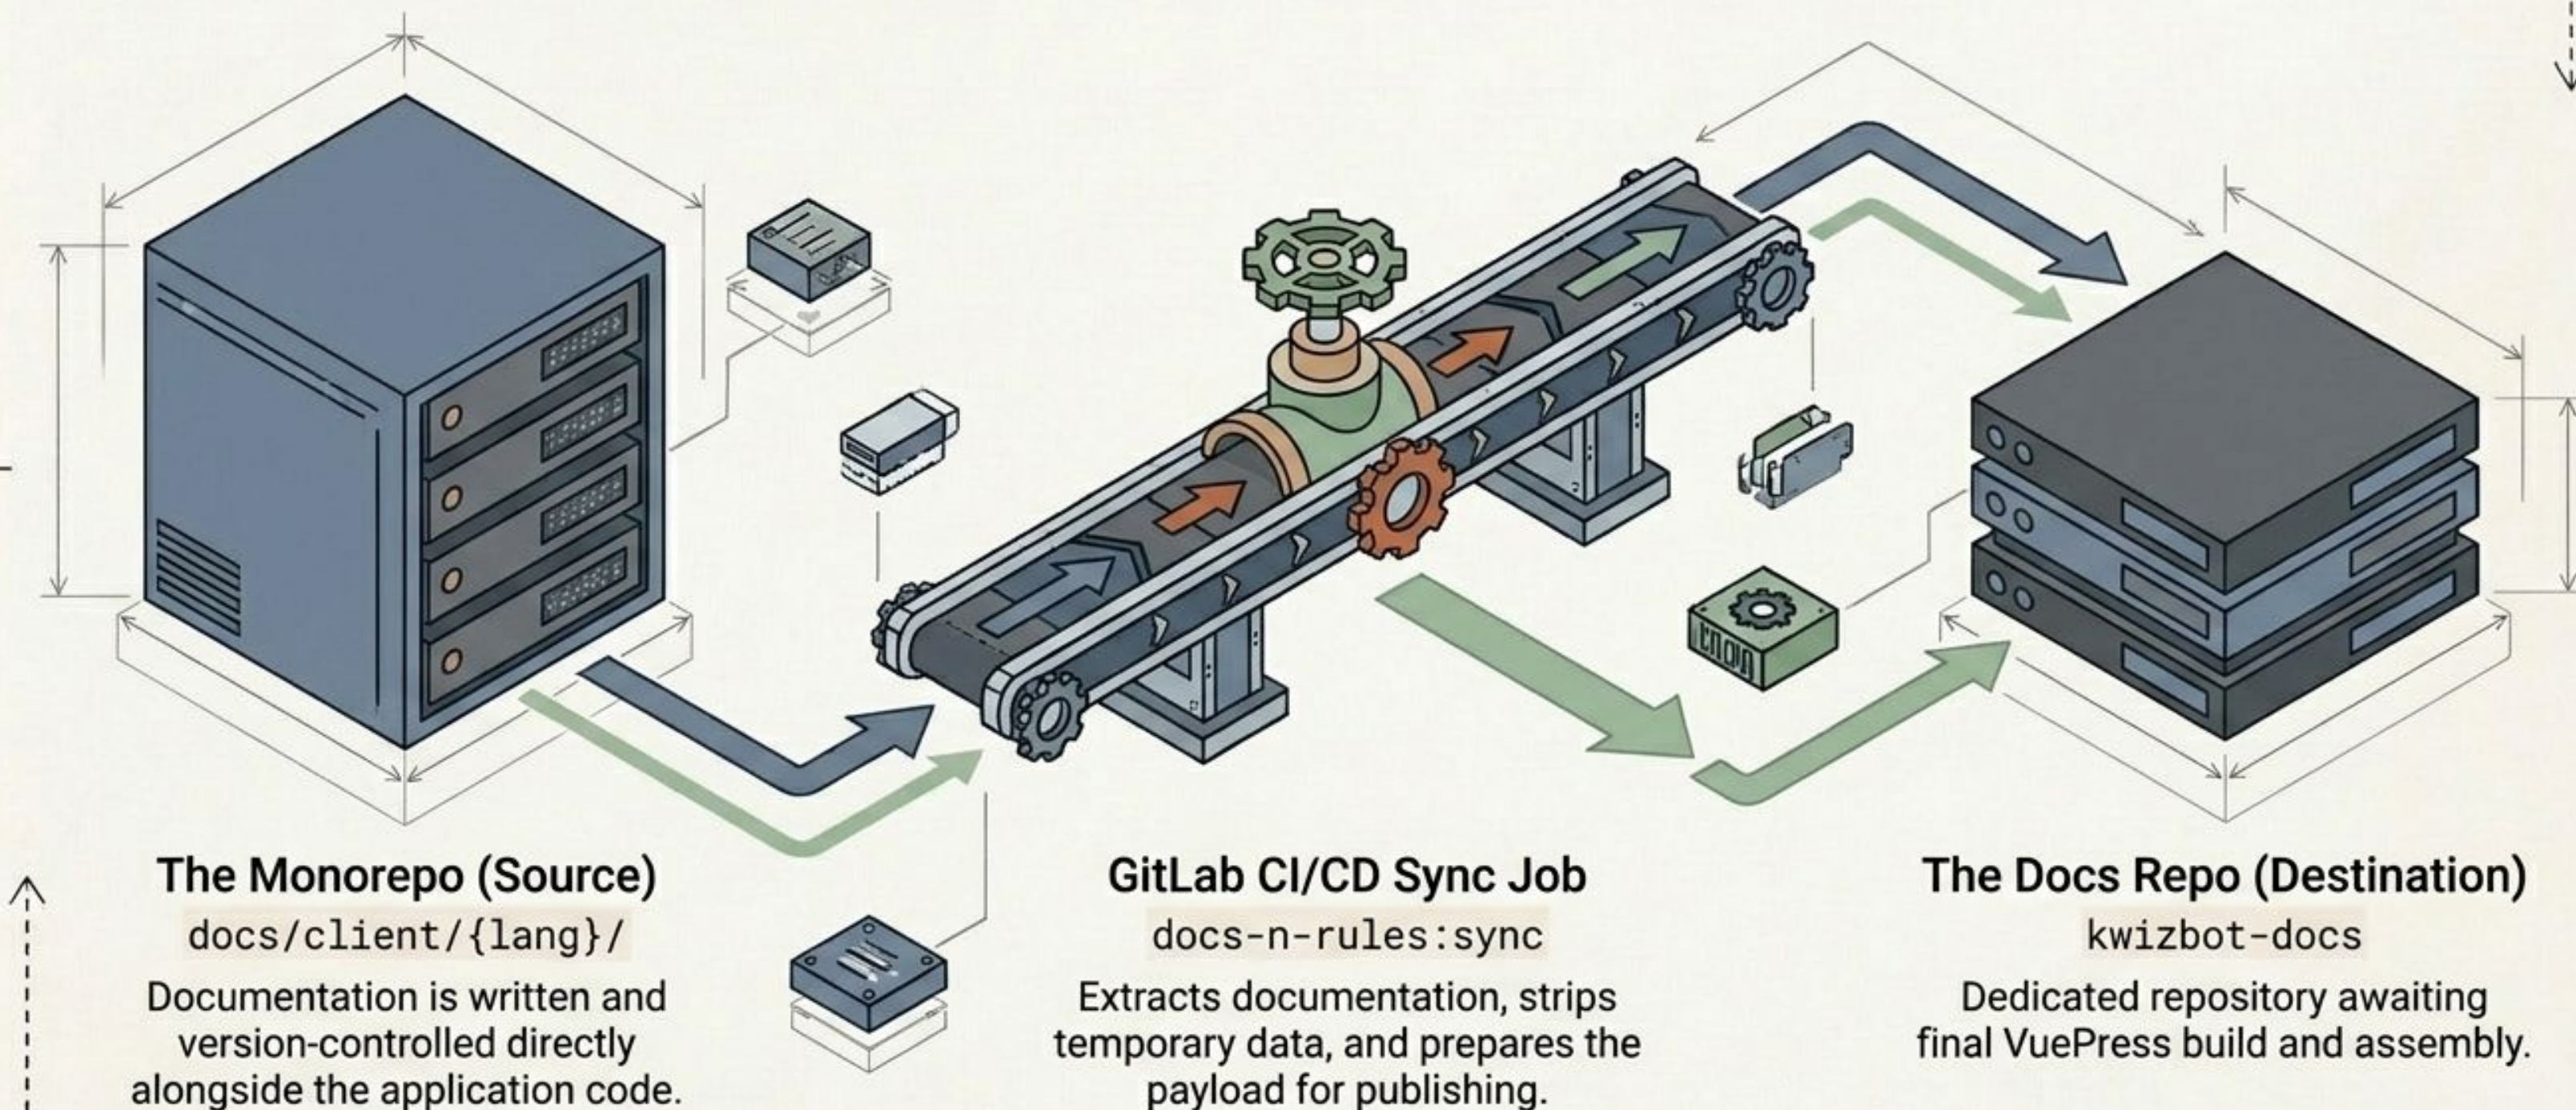

Cross-Linking Validation
Ensures all links are valid.

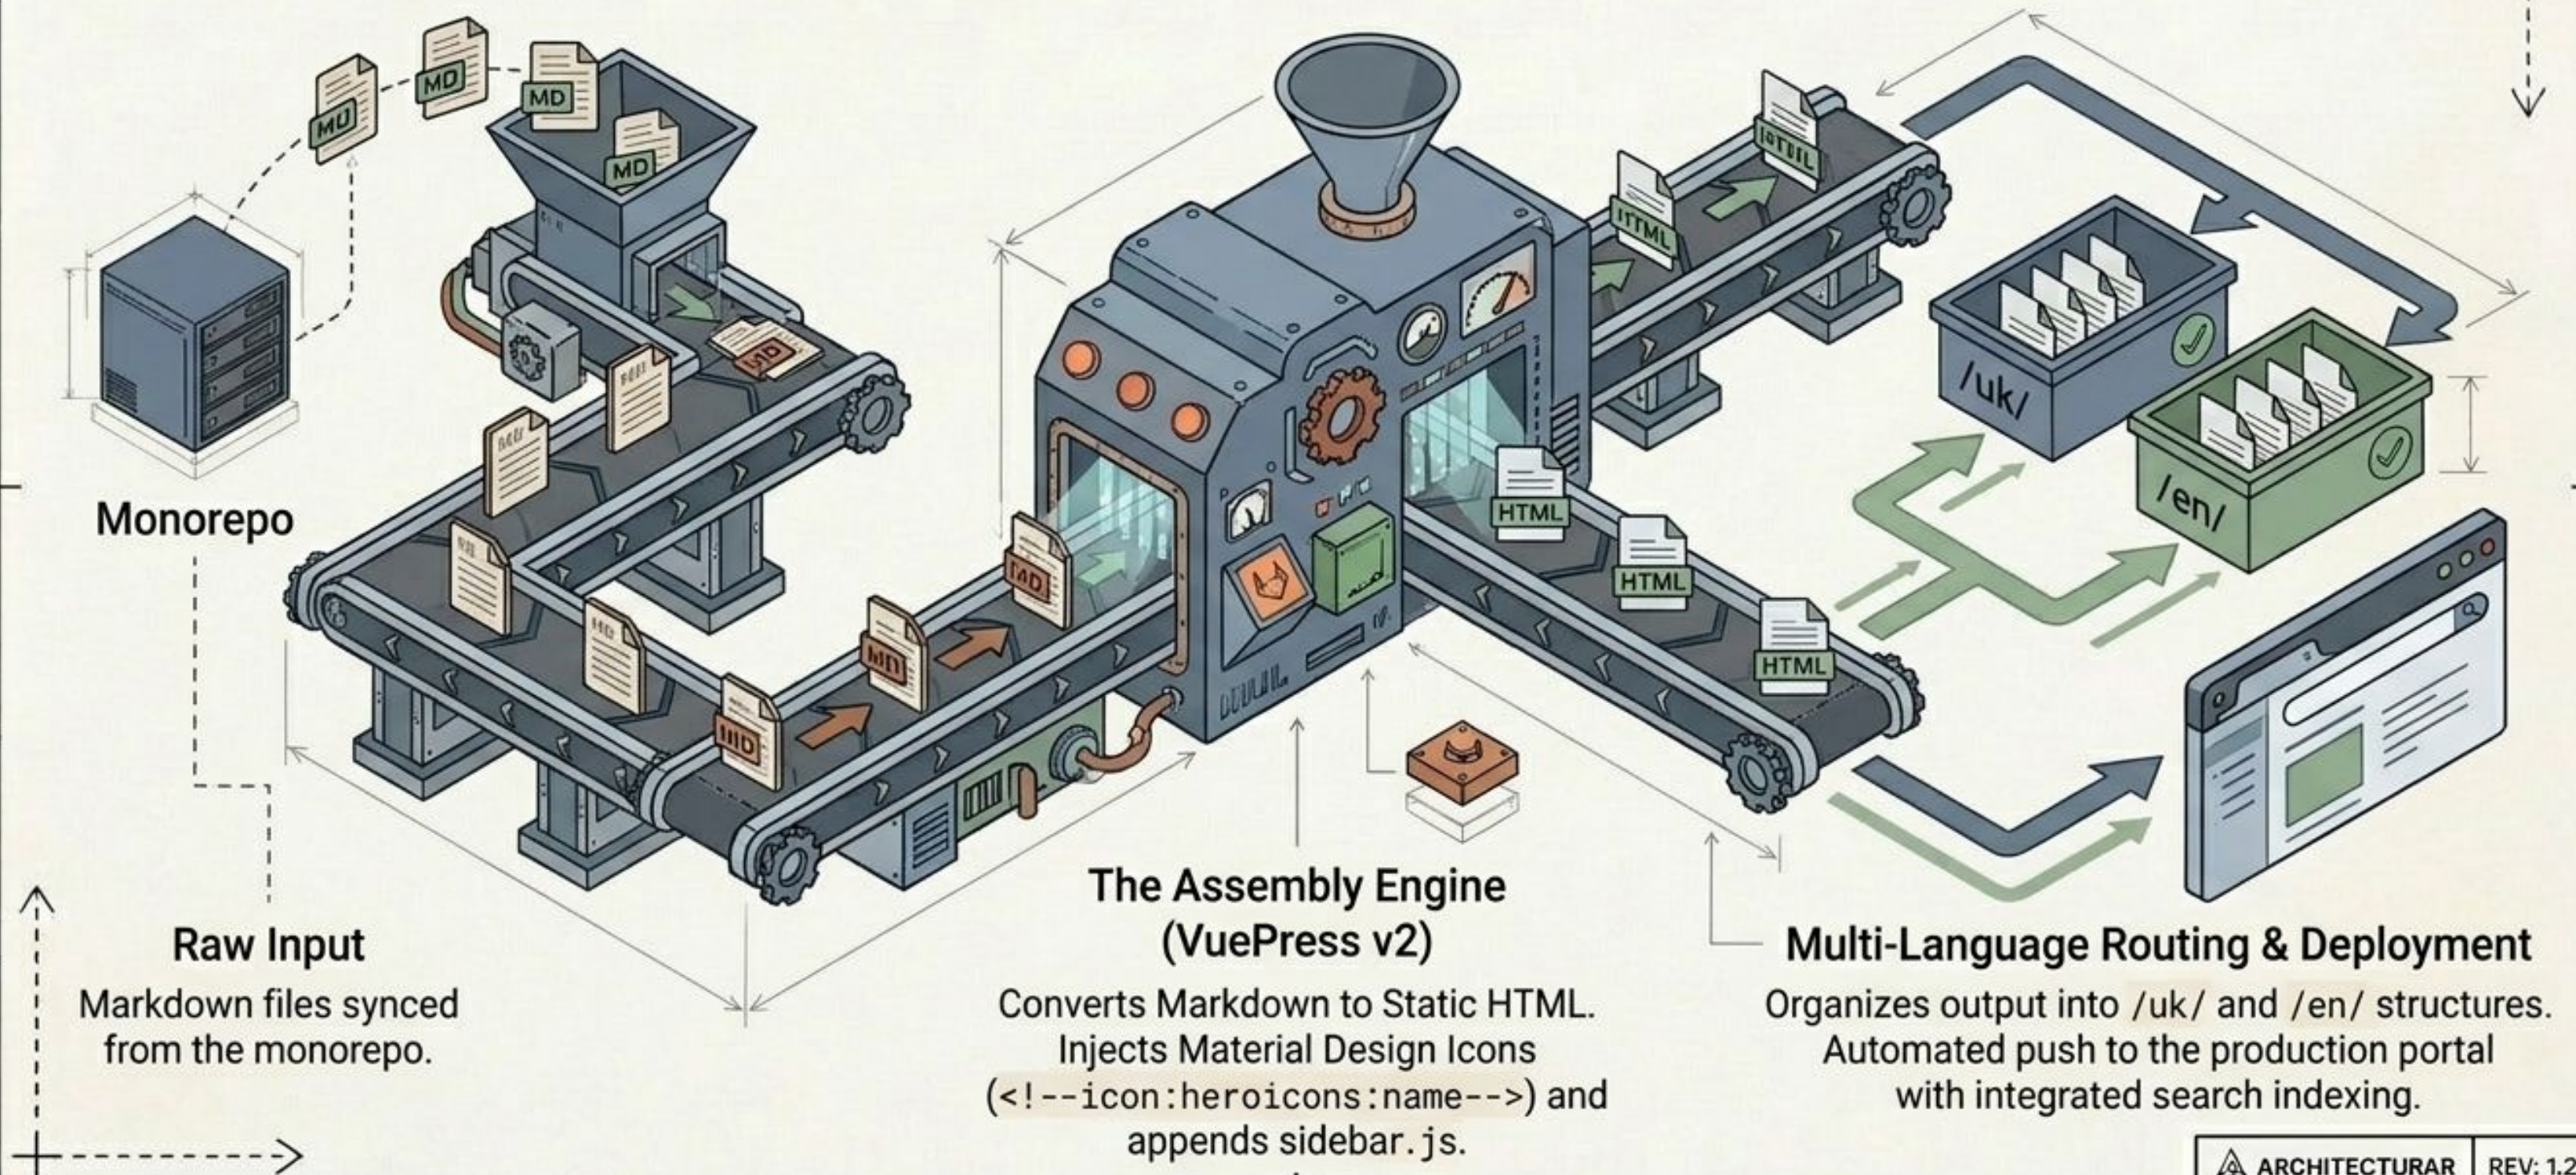

Contextual Awareness
Understands technical and
UI context.

The Architecture: Dual-Repository Sync

Assembly & Deployment (VuePress Build)

Quality Assurance & Tracking

Automated Testing

docs-tester.md

Rules run against newly generated files to ensure structural integrity and correct Diátaxis typing.

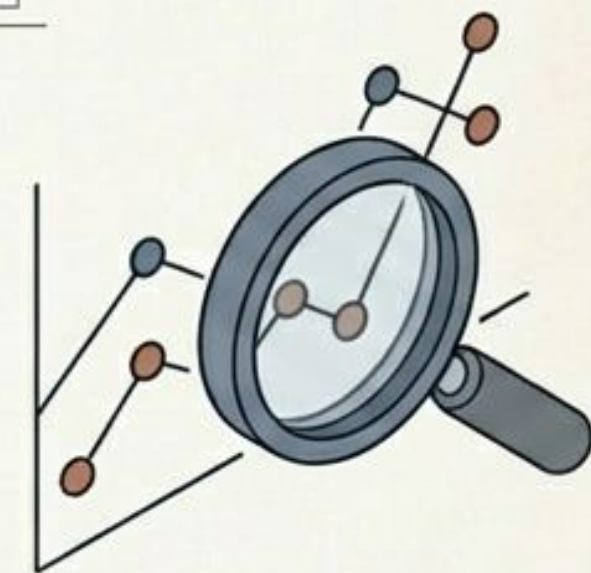

Style & Tone Redaction

docs-redactor.md

Enforces proper UI terminology, ensures phrasing matches the product glossary, and maintains professional tone.

Usage Analytics

PostHog Tracking

Monitors user behavior (docs_opened_hub, docs_search). Identifies content gaps by tracking what users search for but cannot find.

Summary of the Ecosystem
